

Slimline Outlet Plate with Brush Cover and Floating Wall Clips

05MM-WP70

The 05MM-WP70 is a slimline discrete cable management outlet plate. This unit features a brush-style cover to the wall plate opening, allowing you to run AV, data, and TV cables directly between the source and display. This unit can help you easily run cables through a wall, with a discrete slimline opening that can accommodate several cables at once while keeping things neat and organised. It is perfect for use with our RP01/2/3 series recessed wall points to connect wall-mounted TVs with your entertainment system. The WP70 wall plate features two foldout wall mounting clips for a quick, easy and secure installation without additional wall mounting clips.

Features and Benefits

- » Easy installation by pre-installed floating clips, no need for additional wall mounting accessories
- » Perfect for use behind wall-mounted TVs, entertainment cabinets and desks where space is limited for cables and fittings, it takes the strain away from terminations
- » Can be used with TV flyleads, data, HDMI®, speaker and other audio video cables
- » Suitable for both residential and commercial use
- » Designed for 70mm and 90mm wall cavities with cut-out template and instructions supplied
- » High quality heat resistant polycarbonate plastic
- » Suitable for plasterboard
