

# Lock Jaw Ladder Stabiliser for Gutters 36MM-LG01

The LG01 Lock Jaw ladder grip is a revolutionary ladder safety device. It is designed to secure your ladder to standard gutter lips with simple one-handed deployment. By locking onto the gutter lip, the LG01 prevents the ladder from sliding sideways or slipping down the gutter, therefore helping protect it from dangerous falls while working at heights. The LG01 is used by builders, professional rescue services, electrical contractors, and many other trades and home handyperson.

## Features and Benefits

- » Locks ladder to gutter quickly and easily with one-handed operation
- » Suited for most ladders, both single and extension and does not damage gutters
- » It prevents ladders from sliding on gutter surfaces and reduces the risk of dangerous falls
- » Lightweight and can be easily attached to a work belt or harness for easy and quick access
- » Use up to two per ladder for ultimate stability and safety
- » Compact design, which makes storing in work Ute easy and accessible
