EV Car Fire Blanket 9m x 6m Heavy Duty with Storage Bag - Volt Safety

Volt's EV Car Fire Blanket is the most effective solution to extinguish Electric/Hybrid/Lithium battery fires, and also suitable for standard Combustion engine vehicles. The fire blanket quickly prevents the spread of fire, protecting surrounding vehicles, buildings, and other property. It also contains the smoke, toxic gas, and fumes under the blanket.

Key Features:

- Size - Expanded: 9m x 6m x 0.75mm
- Size - Bag: 73cm x 39cm x 28cm
- Weight: 43kg
- Multi-Use - Can be used multiple times (Pending intensity of previous incident and must be inspected prior to reuse)
- Reinforced cross box stitch tabs on blanket for added strength and durability
- Reinforced Aramid Edge Trimming for added strength and durability
- Rated to a peak temperature of 1300°C/2372°F
- High Silicia Composite material
- Silicone coating ensures an airtight seal, quickly isolating and limiting the available oxygen for the fire to burn
- Waterproof bag, can carried like a backpack for portability
- 9m x 6m to suit passenger vehicles including SUV's and Utes
