

CONTROL YOUR AIR. YOUR WAY.

WI-FI SOLUTION

The SMART way to control your MHI Air Conditioner from anywhere using your smartphone or tablet.

- Control your air conditioner via your Google Home or Amazon smart device.
- Set up 'favourite' scenes and activate them with a single tap.
- Set your air conditioner to respond to the weather, you arriving home, calendar events + more.
- Receive instant notifications and email updates and even create usage logs.

IntesisHome 

Compatible with:

Google HOME

amazon
alexa

*via IFTTT application. Must be downloaded separately.

FUNCTIONS

Access all features and functions of your air conditioner remotely. Turn your unit on, check the temperature in your room while you're out and about. Can't remember if you turned your air conditioner off? Now you can easily check and turn your unit off from your smart device anywhere, anytime!

REMOTE CONTROL FUNCTIONS					
	ON/OFF	T° Set Point	Mode	Ambient T°	Fan Control
SMART FUNCTIONS					
	Timer & Scenes	T° Limitation	Email & Push Notifications	Operating Hours	Multi-User
					
	Schedule Calendar	Anti-Frost & Overheat	Error Codes & Descriptions	Maintenance & Filter Cleaning Schedule	Voice Over

SMART HOME INTEGRATION

Turn your MHI unit into a smart air conditioner with IFTTT integration. IFTTT (IF This Then That) allows your air conditioner to easily connect to 3rd party applications, services and devices such as Amazon Echo, Google Home, Gmail, Calendars, Weather Apps plus thousands more, giving your unit advanced, smart functionality.

Control your air conditioner via Amazon Echo or Google home: "Alexa" - set the temperature to 22°C.

Set your unit to turn on or off depending on the weather outside.

Set your air conditioner to turn on when you get close to home.

Set your air conditioner to turn on from the moment you wake up.

COMPATIBLE PRODUCTS

Added compatibility and easy installation. The new, compact MH-AC-WIFI-1 adaptor can be concealed within the MHI indoor unit, ensuring a clean and discreet installation.
