CHEETA SENSOR

SKU:OL7293SS

CHEETA SENSOR includes a passive infrared motion sensor (PIR) which activates the light as you approach. Sensor works after dark and once activated, the light will stay on for approximately 90 seconds. CHEETA also has a manual over-ride, so the light can be switched to stay on. Detection range is 120 degree, 8m max. The CHEETA emits a wash of light from around its sides and through the slats at the front. Perfect for use with an LED globe. Cheeta is a double insulated, opal acrylic exterior (IP44) wall light with a matt black or stainless steel finished face plate.

Additional information

Shipping Weight	1.0 kg
