

**Includes Wavecom  
Calibration Certification**

## Wavecom RCD Test Kit

WCM-RCD Test Kit

### All in one Test Kit for testing portable RCDs and RCDs straight from the switchboard!

The kit includes:

- Digital WCM-RCD tester
- High Tech isolation transformer for testing portable RCDs without tripping the mains switchboard.
- 12 months calibration certificate to Australian Standards valued at \$113
- Switchboard test leads included to conduct testing directly into the mains switchboard
- Test leads and accessories comply with CAT III 1000V, CAT IV 600V.
- 12 month warranty
- Rugged Carry Case
- Conforms to AS/NZS 3760:2022 standards (at 30mA)

The WCM-RCD is a microprocessor based Residual Current Device Tester or an Earth Leakage Circuit Breaker Tester that meets today's standards of safety and performance.

The WCM-RCD unit is a very high quality instrument used by professionals to obtain accurate values of protection time whilst a selectable fault current is injected to the earth. RCD trip time can also be easily measured at the power outlet.

It tests all conventional RCD safety switches in electrical installations and extension leads.

Features:

- Digital voltage reading line to earth
- Over temperature protection
- Mains supply test
- Delayed function test
- Auto power off
- RCD time trip
- RCD ramp current test 10, 30, 100, 300, 500 & 650mA
- 0 and 180 degree phase angle testing
- Microprocessor controlled for highest accuracy & reliability
- 12 month warranty
- 12 months calibration certificate to Australian Standards valued at \$113.
- Conforms to AS/NZS 3760:2022 standards (at 30mA)
